

# NUCLEAR EMERGENCY

## Radiation:

Radiation is naturally found in the environment, and we are exposed to it continually. The sun puts off super charged particles called cosmic rays. Even our bodies store small amounts of radiation. When an atom contains more radiation than it has room for, it seeks to release the energy to stabilize itself; this is when things go wrong.

## Emergency Alert System (EAS)

The Emergency Alert System has been set up to cover a ten (10) mile area. The system is tested the last Wednesday of every month at 10am. The siren is also used to alert us for tornadoes and other emergency.

### **A THREE (3) MINUTE STEADY SIREN BLAST WILL ALERT YOU OF AN EMERGENCY AT THE FERMI (2) POWER PLANT**

If the EAS sounds for three (3) minutes go home or remain in the building. Listen to the directions on one of the EAS radio or television stations below. If the event is a real emergency a Public Inquiry Phone system will activate. The number is **734-243-8600**

Emergency Management Division information numbers

Monroe County 734-240-3135 Wayne County 734-728-3711

**Not** everyone in the (10) mile area will need to evacuate. It depends on the severity of the situation and weather conditions. Listen carefully to your EAS officials for instructions (see the list to the left) the instructions will be repeated often, and the stations broadcast (24) hours a day. The EAS emergency officials will give you direction to your Monroe County Reception Center or Wayne County Reception Center. If you need to evacuate, take the clients medication, clothing and needed personal items. Stay put until further instruction are given
